ANIMP ENERGY SECTION WORKSHOP

November 22nd, 2019

Auditorium ABB
v. L. Lama, 33 Sesto S.G.

South Africa is in the phase to build a **new path** in its **energy resource planning**. **Sustainability, affordability and respect of environmental requirements** are key words in the policy debate.

The new IRP (integrated resource plan) will consider diversified energy mix that includes all forms of energy technologies such as cleaner coal, nuclear, gas, hydro, renewables and battery storage.

The discussion is around the effective use of all energy sources at South Africa disposal to achieve security of supply in a sustainable and affordable way to support economic growth **in line with the United Nations Sustainable Development Goal**.

Italian Energy Plant Companies and their experience in the energy sector are keen to **support South Africa** in its roadmap and achieve its goals.

To attend please register on eventbrite at the following link:
